Subject: ComposePro – Hands-on Workshop on Jetpack Compose

We are pleased to invite you to **ComposePro**, a hands-on workshop on **Jetpack Compose**. It will be organized by **DroidLinX** on **February 3, 2025**, from **9:30 AM – 4:25 PM**, in **C3 Seminar Hall (Old, 101)**.

This workshop aims to provide students with a practical learning experience in **modern Android UI development** using **Jetpack Compose**. Participants will gain hands-on experience with:

- ✓ Building **UI with Jetpack Compose** for intuitive app design.
- ✓ Understanding and implementing **MVVM architecture** in Android apps.
- ✓ Integrating **RESTful APIs** and handling **JSON parsing**.
- ✓ Developing a fully functional Android project from scratch.

All students interested in **Android development** and UI design are encouraged to attend and make the most of this opportunity.

ComposePro: Elevate your Android Skills

The **ComposePro: Elevate Your Android Skills** workshop is a **one-day, project-based hands-on session** designed for students interested in **modern Android development with Kotlin**. Organized by **DroidLinX**, this workshop provides in-depth guidance on **Jetpack Compose**, helping participants build dynamic and responsive UI components efficiently.

The session covers:

- **Introduction to Jetpack Compose** and its declarative UI approach.
- **Building interactive UI components** using Composable functions.
- **State management and navigation** in Jetpack Compose.
- **MVVM architecture implementation** for better code structuring.
- **Working with RESTful APIs** to fetch and display real-time data.
- **Project development** to apply learned concepts in a practical scenario.

Participants will gain valuable **hands-on experience**, interact with peers, and get insights into industry practices for modern Android development.

Objectives:

The **ComposePro** workshop aims to equip students with hands-on experience in **Jetpack Compose**, Google's modern UI toolkit for building native Android applications. By the end of the session, participants will:

- Understand the **fundamentals of Jetpack Compose** and its advantages over XML-based UI.
- Learn to implement **MVVM architecture** for scalable and maintainable Android applications.
- Integrate **RESTful APIs and parse JSON data** in Android apps.
- Build a **fully functional project** using best practices in modern Android development.
