

Event Description

Event Name	
Brief Description [100 Words]	
Objective of the Event [Points	
Outcome of Event	
AICTE [ACTED Framework Element] [See Annexure 1]	
NSQF Level[See Annexure 1]	
Guest Name [Affiliation/Designation]	
Subject <i>[Event organized for the supporting which subject with subject code]</i>	
Section <i>[Applicable only when the whole class is participating]</i>	

Annexure 1:

A. ACTED Framework by AICTE

Element	Full Form	Description
A	Awareness	Creating awareness about emerging technologies, industry trends, government schemes, and national-level opportunities (e.g., SIH, NEP 2020).
C	Competency Building	Developing technical and soft skills through workshops, certifications, hands-on projects, and industry-academia initiatives.
T	Technology Integration	Promoting the use of modern tools and platforms (e.g., AI, IoT, ML, Cybersecurity) to support digital transformation in teaching and learning.
E	Entrepreneurship & Innovation	Fostering an entrepreneurial mindset via hackathons, innovation cells, startup incubation, and business idea validations.
D	Deployment & Dissemination	Implementing projects in real-world scenarios and sharing success stories, research, and case studies through seminars, journals, and expos.

B. NSQF Levels

Each NSQF Level defines learning outcomes based on five key areas: Process (type and complexity of work), Professional Knowledge (depth of subject understanding), Professional Skill (practical application of knowledge), Core Skill (communication, numeracy, and digital skills), and Responsibility (level of autonomy and accountability). These descriptors ensure that qualifications are aligned with industry needs and support seamless career and academic progression.

NSQF Level	Description	Typical Qualification
Level 4	Independent work, problem-solving in familiar contexts	Class 12 or Advanced Certificate
Level 5	Supervisory role, responsibility for others, analytical reasoning	Diploma or Advanced Diploma
Level 6	Advanced skill with judgment, planning, and decision-making	Bachelor's Degree or equivalent
Level 7	Requires critical thinking, innovation, and responsibility for projects	Bachelor's Degree with Honours / Postgraduate Diploma
Level 8	Highly specialized knowledge, research skills, and leadership	Master's Degree or equivalent

C. Primary Graduate Attribute Developed (UGC-Aligned)

1. Digital and Technological Skills

The ability to effectively use digital tools, platforms, and technologies for solving real-world problems. This includes coding, simulations, data analytics, IoT, AI, and digital literacy.

2. Complex Problem-Solving

The capacity to identify complex issues, break them into manageable parts, and apply innovative, logical, and structured approaches to reach solutions.

3. Disciplinary Knowledge

Deep understanding and command of concepts, theories, and practices specific to a particular field of study or discipline.

4. Communication Skills

The ability to express ideas clearly and effectively through oral, written, and digital mediums in both academic and professional settings.

5. Critical Thinking

The ability to analyze issues objectively, evaluate diverse perspectives, and form reasoned judgments or solutions based on evidence and logic.

6. Environmental Awareness and Action

Understanding environmental challenges and actively participating in sustainable and eco-friendly practices to promote responsible citizenship.

7. Analytical Reasoning / Thinking

The skill to evaluate data, patterns, and relationships, make inferences, and solve problems through evidence-based logical processes.

8. Multicultural Competence and Inclusive Spirit

The ability to appreciate, respect, and work effectively with individuals from diverse backgrounds, cultures, and perspectives.

9. Research-Related Skills

Ability to formulate research questions, design methodologies, collect and analyze data, and draw meaningful conclusions.

10. Coordinating / Collaborating with Others

Working effectively in teams, building consensus, sharing responsibilities, and contributing to group goals.

11. Leadership Readiness / Qualities

Demonstrating initiative, decision-making ability, ethical responsibility, and the capacity to inspire and guide others.

12. Creativity

The ability to generate original ideas, think innovatively, and apply novel solutions across domains.

13. Empathy

Understanding and being sensitive to others' feelings, perspectives, and experiences, fostering compassion and human-centered interaction.

14. Community Engagement and Service

Participation in activities that benefit society, encourage civic responsibility, and address social issues through active involvement.

15. **Autonomy, Responsibility, and Accountability**

The ability to work independently, make ethical decisions, take responsibility for actions, and uphold professional and social accountability.

16. **Value Inculcation**

Internalizing ethical values such as integrity, respect, equity, and social justice that guide both personal and professional conduct.

17. **Learning How to Learn Skills (Lifelong Learning)**

Developing self-directed learning habits, adaptability, and curiosity to continue acquiring knowledge and skills beyond formal education.

18. **Disciplinary Knowledge** (*repeated*)

Already listed in point 3; this reinforces its core role in all academic and professional development pathways.
